CHANGES IN EU LEGISLATION RED SALT LICK BECOMES WHITE

**UNIVERSAL
MULTI
extra iron**

The **KNZ™ UNIVERSAL MULTI** salt lick contains iron oxide, which is very suited to animals with a higher need of iron. Iron oxide causes the red color of the salt lick. Recently, the European Union has announced that iron oxide will no longer be allowed as a nutritional source for animals. Consequently, the new **KNZ™ UNIVERSAL MULTI** salt lick contains iron carbonate instead of iron oxide.

Iron carbonate is white, therefore the white colour of the new **KNZ™ UNIVERSAL MULTI**. Iron carbonate creates a better taste and is better absorbable in the intestinal tract of the animal. Additionally, this type of iron interferes less with other minerals.

SALT (NaCl)	%	> 99
SODIUM	%	39,1
MAGNESIUM	%	0,2
ZINC	mg/kg	810
COPPER	mg/kg	-
IODINE	mg/kg	50
SELENIUM	mg/kg	10
SELENIUM YEAST	mg/kg	-
IRON	mg/kg	750
VITAMINE A	IU	-
VITAMINE D3	IU	-
VITAMINE E	IU	-
VITAMINE H/BIOTIN	mg/kg	-
SUITABLE FOR USE IN ORGANIC FARMING		✓

Dairy cows need salt for good health and production. KNZ™ salt licks safeguard the salt requirement of each individual animal and complement trace minerals and vitamins requirement. Always exactly the right amount of salt, because animals will take the salt they need.
